

Journal of 1 February 1960

1. Max Lehrer telephoned inquiring if we could make available to the Senate Aeronautical and Space Sciences Committee for tomorrow the comparative estimates chart. He also inquired when the small charts would be available for inclusion in the record.

Later in the day he was advised that the big chart could be made available and the smaller charts would also be made available although probably not all of the charts and photographs would be ready by tomorrow.

Lehrer also asked about the 25 January issue of MISSILES AND ROCKETS where on page 59 there is an interview with a returnee German scientist, Dr. Helmut Grottrup. Lehrer wished (a) information on the man and (b) our comments on the substance.

Colonel Carter in OSD L&L and Major Brower in AF L&L were advised of the request by the Committee for the comparative estimates chart for their information.
